

Please do not make it easier for large corporations to acquire greater shares of the different communications media. We need greater diversity in our communications outlets, not greater concentration. Liberty requires that we have the right and the opportunity to express ourselves. All too often our opportunities are limited by the lack of outlets. The large corporations have tended to express a limited number of views and have permitted others to express only the views with which the corporations sympathize. We need more, not fewer, owners in the communications businesses. Please do not expand the control already held by the large corporations.
